

Legal, Ethical and Professional Issues in Information Security

•Objective

- To provide a foundational understanding of ethical theory
- To provide a process for analysing ethical situations and for making decisions in response to them
- To provide the opportunity for students to consider some ethical circumstances involving Information Technology that the potential to harm individuals, organisations, or society

• **Introduction: What are “Ethics”?**

- Set of rules
- The study of what it means to do the right thing
- Principles based on our understanding of what is good, right, proper, moral or ethical
- Ideas of behaviour that are commonly acceptable to society
- Improves ethical decision making
- Promotes high standard of practice and ethical behaviour
- Enhances trust and respect from the general public
- The importance of integrity

•The Difference between Morals, Ethics and Laws

- Morals: one's personal beliefs about right and wrong
- Ethics: standards or codes of behaviour expected of an individual by a group
- Law: system of rules that tells us what we can and cannot do
 - Laws are enforced by a set of institutions
 - Legal acts conform to the law
 - Moral acts conform to what an individual believes is the right belief or right and wrong

- Ethics in the Business World
- Several trends have increased the likelihood of unethical behaviour:
 - Globalization creating complex work environments
 - Organizations challenged to maintain profits/revenue
 - Recent scandals in IT companies
 - Satyam computer services
 - HP
 - Computer associates international
 - IBM
